Price and Editions – Basis version is free!

SYSTEM REQUIREMENTS

Windows XP, Vista, 7 oder Server 2003/2008; 32 oder 64 Bit, 1 GB RAM minimum

Qualidator has achieved "Windows 8 App Certification" (Feb 2014)

Qualidator® SiteAnalyzer has been tested to meet all of the technical requirements to be Compatible with Windows® 7. (Feb 2010)

Only "Compatible with Windows® 7" software and devices have passed Microsoft-designed tests for compatibility and reliability on PCs running the Windows 7 operating system. "Compatible with Windows 7" products install without worry and run reliably with Windows 7.

DETAILED DESCRIPTION

Weak spots are listed colour-coded by single pages (URL) and amount of weak spots identified. At the same time, the size and download time of every single page is calculated. The tested pages can be displayed in a choice of three ways: browser mode with direct page preview, report mode with a list and a summary of the weak spots identified, or code mode with the identified weak spots highlighted in colour.

Tests can be switched on and off, and they allow to prioritise and to focus on specific aspects of a website quality assurance. The test settings are individually configured and are preserved when the programme is switched off. At the same time, the ranking of Qualidator and the Alexa Pagerank of the web project are determined at the start of the test.

The detailed report function allows a constant overview of the still existing weak spots. All test results can be exported or saved for use at a later time.

FEATURES

- Validation (syntax test) of CSS and HTML
- Qualidation (quality test) of CSS and HTML
- Qualidator results (broken down in SEO, accessibility, usability) as well as Alexa Page Rank are displayed in single view
- Testing of all single pages of your website
- Listing of the weak spots by single page (URL)
- Display of the pages size and download time
- Every tested single page can be viewed in preview mode
- Direct indication of the weak spots in the code
- Optional switch on/off of the single validation and qualidation tests
- Meaningful reports
- Exporting and saving the results

WHY CHOOSE SITEANALYZER

- Time savings through exhaustive quality and validation tests of a web project through a single software
- Efficient work on a web project thanks to a test carried out throughout the whole website
- Weak spots in the code are highlighted and thus easily identified
- The optional on/off switch of the single validation and qualidation tests allow a prioritisation and focusing on specific aspects of the quality tests
- Improvements and developments can be displayed by exporting and saving results

SCREENSHOTS

The screenshot displays the Qualidator Website Analyzer interface. At the top, there are navigation tabs for 'Date', 'Hilfe', and 'Extras'. Below this, a status bar shows 'Gefundene Fehler: 13', 'Seiten in der Wartungsliste: 153', and 'Qualidator Bewertung: Admin Tests: 30/30'. A table lists 13 errors with columns for ID, Titel, URL, Bemerkungen, Fehler, Schwere, W3C Validierung, and Lokales. The table shows errors such as 'prett_styles.css' and 'styles_home.css' with severity levels like 'Warning' and 'Error'. Below the table, a 'Fehler Log' tab is active, showing the source code of the page with red markers indicating the locations of the detected errors.

Errors and indications are displayed directly in the source code, other display modes can be accessed by selecting the relevant tabs

The screenshot shows the settings dialog box of the Qualidator Website Analyzer. It is titled 'Bitte wählen Sie die Tests aus, welche Sie beim Testen anwenden wollen.' The dialog is divided into several sections: 'Selenitel' (with options like 'Nicht vorhandene Selenitel' and 'Unpräzise oder nicht aussagekräftige Sei...'), 'Meta' (with options like 'Veraltete automatische Weiterleitung zu...' and 'Anzahl Keywords'), 'Überschriften' (with options like 'Überschriften (h1, h2, etc.) und logisch...' and 'Überschriftensystematik (h1-h6)'), 'Bilder' (with options like 'Leerbilder' and 'Fehlende Bezeichnung der Höhe und Breite...'), 'Links' (with options like 'Links zu lokalen Dateien' and 'Kein Wort im Link (nur Zeichen)'), 'Schaltflächen' (with options like 'Schaltfläche "Times New Roman"' and 'Schaltvergrößerung'), 'Diverse' (with options like 'Explizite Bezeichnung von Eingabefeldern...' and 'Spaghetti-Makup'), and 'Tabelle' (with options like 'Kopfzellen von Tabellen' and 'Zusammenfassung des Tabelleninhalts'). At the bottom, there are buttons for 'Alle auswählen', 'Usability', 'Accessibility', 'SEO', and 'Alle abwählen'. Below the settings, there is a 'Lizenz' section with fields for 'Benutzername', 'Passwort', 'Lizenzschlüssel', and 'Lizenzstatus'. There is also an 'Andere Optionen' section with a 'Sprache' dropdown set to 'de', a 'User Agent' dropdown set to 'Qualidator Website Analyzer', an 'Accept Language' dropdown set to 'en-us', and a checkbox for 'Überprüfung externer Links aktivieren'. At the bottom right, there are buttons for 'Speichern und Schließen', 'Übernehmen', and 'Schließen'.

Numerous options are available. The applied tests can be controlled by the user at any time.
